XI. TEACHING

Dr. Schwatka has developed and directed courses in Total Worker Health and currently directs the Department's TWH Certificate Program and is the director of the NIOSH MAP ERC's TWH Certificate Program. She proposed and developed new course formats to meet the needs of the different education programs her department operates. She is passionate about giving students opportunities to apply knowledge out in the community through mentored field work. Outside of her Department, she regularly guest lectures in undergraduate and graduate classes at the University of Colorado Denver and Colorado State University.

XII. RESEARCH RECORD

Dr. Schwatka's research focuses on Total Worker Health surveillance, intervention development and evaluation, and translation of research into practice. Currently, she the Research Core Director of the Center for Health, Work & Environment and is a co-investigator on CDC/NIOSH projects focused on intervention development and evaluation and surveillance. As a researcher, she aims to understand how to develop practical organizational-level interventions that improve the working conditions of high risk populations, such as construction workers and small businesses.

Hospitalists are the predominant care model across US hospitals, yet it is unknown how hospitalist workload influences worker well-being, mental health, and work performance. This work will provide evidence to guide what the optimal workload is to drive improved outcomes for hospitalist well-being, mental health, and work performance and will provide a decision support tool to drive data-driven staffing decisions.
