

Collecting I/O Data in a Community Clinic Setting: A NIOSH Pilot Project in South Los Angeles

Kevin Riley, PhD, MPH, UCLA Labor Occupational Safety and Health Program

Western States Occupational Network (WestON) Meeting
Denver, Colorado
September 2017

OHS and Community Health

- ▶ Community health centers as primary source of healthcare for many low-wage workers and their families
- ▶ Many CHCs lack the capacity to diagnose, treat, advise or refer patients with work-related conditions
- ▶ Potential roles for CHCs:
 - ▶ Clinical care for injuries/illnesses
 - ▶ Occupational health surveillance and detection
 - ▶ Partnerships to identify and combat hazardous workplaces

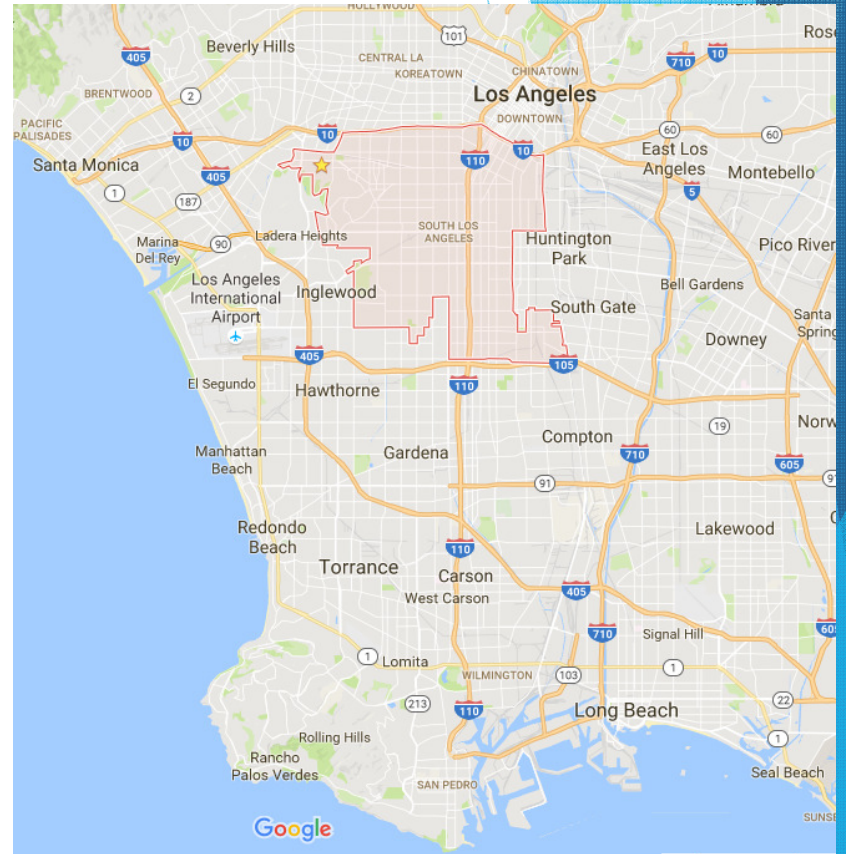

St. John's Well Child and Family Center

- ▶ One of the largest safety-net healthcare providers in Central and South LA
- ▶ Network of Federally Qualified Health Centers and school-based clinics
- ▶ Over 266,000 patient visits each year
- ▶ Commitment to social determinants of health

Context: South Los Angeles

- ▶ Home to a large population of low-wage, immigrant workers and their families
- ▶ Many rely on community health centers as primary source of medical care

Work and Health Initiative Partners

- ▶ UCLA Labor Occupational Safety and Health Program (UCLA-LOSH)
- ▶ CLEAN Carwash Campaign
- ▶ Garment Worker Center
- ▶ Restaurant Opportunities Center of Los Angeles (ROC LA)
- ▶ *Instituto de Educación Popular del Sur de California* (IDEPSCA)
- ▶ Los Angeles Black Worker Center
- ▶ Southern California Coalition for Occupational Safety and Health

Components of Work and Health Initiative

- ▶ Health screenings and preferred treatment for worker center members
- ▶ Pilot occupational health clinic
- ▶ Collection of industry and occupation data
- ▶ Support for workers' compensation access

Components of Work and Health Initiative

- ▶ Health screenings and preferred treatment for worker center members
- ▶ Pilot occupational health clinic
- ▶ Collection of industry and occupation data
- ▶ Support for workers' compensation access

Health Screenings and Treatment

Components of Work and Health Initiative

- ▶ Health screenings and preferred treatment for worker center members
- ▶ Pilot occupational health clinic
- ▶ Collection of industry and occupation data
- ▶ Support for workers' compensation access

Pilot Occupational Health Clinic

- ▶ Total of 34 patients referred over 3 months
- ▶ **Common industries:** garment manufacturing, restaurant/food service, construction, small factories/warehouses
- ▶ **Common Px concerns:** back and joint pain, tingling in legs and arms, skin irritation, work-related stress

Components of Work and Health Initiative

- ▶ Health screenings and preferred treatment for worker center members
- ▶ Pilot occupational health clinic
- ▶ Collection of industry and occupation data
- ▶ Support for workers' compensation access

Collecting Industry and Occupation Data

- ▶ Funding through NIOSH NORA mechanism
- ▶ Contract with primary healthcare organization to:
 - ▶ Oversee EHR modifications and training of relevant staff
 - ▶ Collect patient I/O data for 8-12 months
 - ▶ Evaluate quality of data collected and effect on workflow
- ▶ Contract awarded to St. John's in October 2013; project work began Spring 2014
- ▶ UCLA-LOSH provided project support and technical assistance

Collecting Industry and Occupation Data

- ▶ Scope of work detailed requirements for a modified HER system that would capture minimum of I/O for multiple jobs, archive data over time, and allow work to be visible in the medical module
 - ▶ Contractor added capture of current employment status and employer to I/O
- ▶ Data to be collected during patient registration by front desk staff or medical assistants

“Pilot-within-a-pilot”

- ▶ Capture of I/O pairs for 869 patients
- ▶ Valuable lessons learned for project:
 - ▶ Occupation completed more often than industry; industry concept evidently less well understood
 - ▶ More mini-training/refreshers needed
 - ▶ EHR ‘workaround’ entry not ideal for data collection
 - ▶ Registration staff able to capture codeable data

What is my industry?

What is my occupation?

Results of Data Collection

- ▶ From September 1, 2015 through April 18, 2016, **26,480 patient visits** were recorded; **10,384 unique patients**
- Employment status recorded for 10,359 patients:

| Employment Status | N | % |
|-------------------|-------|------|
| Unemployed | 7,043 | 68.0 |
| Employed | 2,968 | 28.7 |
| Retired | 348 | 3.4 |

- About 23% of records include missing Industry field

Data Sample: Sept-Nov 2015

| Industry/Sector | Pct. |
|-----------------------------|-------|
| Restaurant/food service | 10.4% |
| Domestic work | 9.0% |
| Warehouse | 8.3% |
| Retail/sales | 7.6% |
| Garment manufacturing | 6.5% |
| Construction | 4.9% |
| Manufacturing (non garment) | 4.5% |
| Medical | 4.4% |
| Childcare | 3.8% |
| Transportation | 3.7% |
| Day labor | 3.5% |

N = 1,643

I/O Data Collection: Some Lessons Learned

- ▶ With some training, registration personnel were able to collect basic I/O data
- ▶ Industry more difficult concept than occupation for registration personnel
 - ▶ Asking employer before I/O seemed to facilitate capture of Industry
- ▶ Staff turnover necessitated repeated (short) training
- ▶ Small HIT project vastly different from changes potentially made by EHR vendor

Components of Work and Health Initiative

- ▶ Health screenings and preferred treatment for worker center members
- ▶ Pilot occupational health clinic
- ▶ Collection of industry and occupation data
- ▶ Support for workers' compensation access

Workers' Compensation Access

Challenges

- ▶ How to bring pieces of initiative together???
- ▶ CHC staff turnover
- ▶ Competing demands of health center providers and staff
- ▶ Replacement of St. John's EHR system (June 2016)

Lessons Learned and Future Directions

- ▶ Importance of addressing work and health concerns in community-based setting
- ▶ Feasibility of collecting I/O data from patients, using data to develop OHS programs
- ▶ Role of “cheerleaders” within CHC to promote OHS activities
- ▶ Value of collaboration with worker advocates and those with OHS expertise

Thank you
