

COWP PSE Change Process

STRATEGY 2

Prioritizing PSE Changes

Purpose of Prioritizing Changes:

For every possible policy, system or environmental (PSE) change, it is important to determine the importance and feasibility of each change. Using a rating scale will help to identify the highest priority changes for each unique community.

LOW=not at all important/feasible

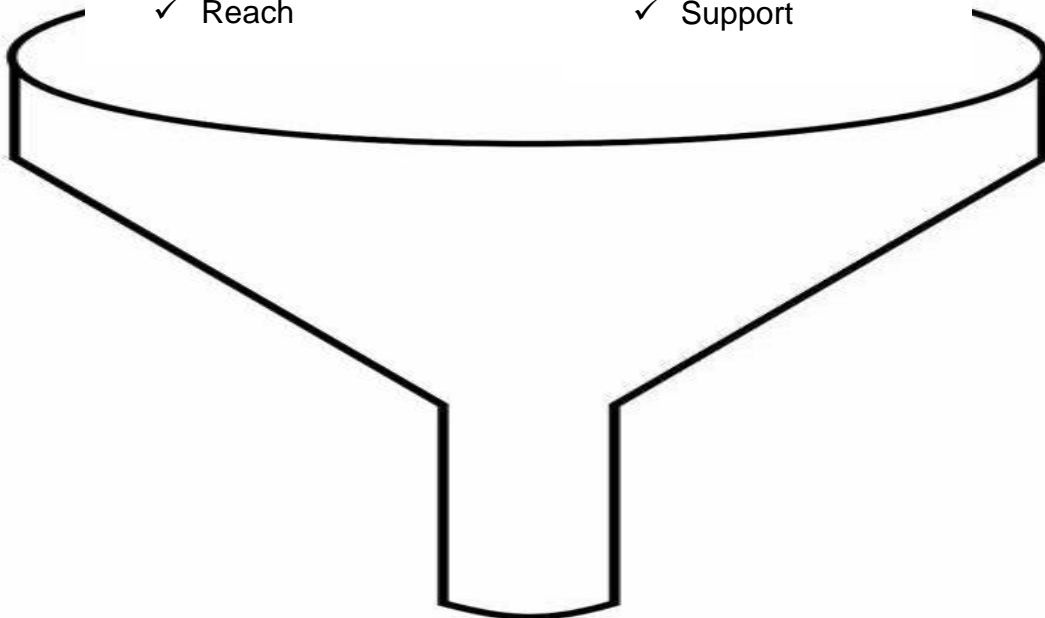

HIGH=very important/feasible

Importance of the change:

- ✓ Evidence-based
- ✓ Frequency of impact
- ✓ Reach

Feasibility of the change:

- ✓ Cost
- ✓ Time
- ✓ Support

GOAL: High Importance + High Feasibility = Highest Priority PSE Changes

Materials Needed for Strategy 2:

Definitions of Importance and Feasibility
